ENGINEERING

**Code:** EGR 230

**Title:** Strength of Materials

**Division:** STEM

**Course Description:** The course presents the theory and analytical techniques used in the design and analysis of engineered structural components. The course addresses the principles of stress and strain, mechanical properties of materials, and beam and bar analysis. The study of structural components includes axial forces, torsion, bending, shear, combined loading, buckling and design. Concepts such as principal stresses, Hooke’s Law for plane stress, and failure criteria are introduced.

**Prerequisite:** EGR 201

**Credits:** 3 cr.

**Required Materials (Check Bookstore for Latest Edition):**
Click on the bookstore for the supplies which you are attending each class.
[rcbc.edu/bookstore](http://rcbc.edu/bookstore)

**Course Learning Outcomes:**
Upon completion of this course, students will be able to:

- Identify relevant mathematical, physical, or systems principles:
  - Determine the mechanical properties of materials using the stress-strain diagram

- Formulate problems based upon applicable principles and/or theorems:
  - Compute the average normal and direct shear stress and strain in members
  - Calculate the axial, torsion, bending and shear stresses in mechanical elements
  - Determine the stresses in any desired direction and obtain the principal stresses by combining various stress components using computational and graphical methods
  - Calculate deflections of determinate beams and shafts using different techniques

- Select an effective method and perform necessary calculations to solve a problem:
Analyze indeterminate beams and shafts using compatibility of deformations
- Determine critical (Euler) buckling loads of axially loaded columns with various end conditions
  - Analyze the results:
    - Analyze the strength requirements of structural/machine elements under different types of internal forces

**GENERAL EDUCATION OUTCOMES IN THIS COURSE:**

<table>
<thead>
<tr>
<th>Core Course Content:</th>
</tr>

<tbody>
<tr>
<td>Stress and strain</td>
</tr>
<tr>
<td>Mechanical properties of materials</td>
</tr>
<tr>
<td>Axial, lateral, and torsional loading of shafts and beams</td>
</tr>
<tr>
<td>Statically indeterminate structures</td>
</tr>
<tr>
<td>Temperature and prestrain effects</td>
</tr>
<tr>
<td>Shear force and bending moment in beams</td>
</tr>
<tr>
<td>Axial, shear, bearing and bending stresses</td>
</tr>
<tr>
<td>Combined loading</td>
</tr>
<tr>
<td>Deflection of beams</td>
</tr>
<tr>
<td>Buckling of columns</td>
</tr>
<tr>
<td>Hooke’s Law for plane stress</td>
</tr>
<tr>
<td>Failure criteria and failure analysis</td>
</tr>

**Writing assignments:** students will analyze current issues in the field using current articles from the popular press as well as library research including electronic resources databases.

**Speaking assignments:** students will present research individually or in groups using current technology to support the presentation (e.g., PowerPoint presentation); students will participate in discussions and debates related to the
topics in the lessons. Discussions may also focus on cross-cultural and legal-ethical dilemmas as they relate to the course content.

- **Simulation activities:** Trends and issues will be analyzed for their ethical as well as social or legal significance. Students might role-play common situations for classmates to analyze. Current news articles may be used to generate discussion.

- **Case Studies:** Complex situations and scenarios will be analyzed in cooperative group settings or as homework assignments.

- **Lectures:** This format will include question and answer sessions to provide interactivity between students and instructor.

- **Speakers:** Representatives from various related fields may be invited to speak.

- **Videos:** Related topics will provide impetus for discussion.

**EDUCATIONAL TECHNOLOGY:**

Rowan College at Burlington County advocates a technology enhanced teaching and learning environment. Advanced technological tools may be used in any course section to facilitate instruction. Many of our sections are web-enhanced, which means that some of your work will be submitted or completed online. Web enhancements may include online materials, grade books, testing and quizzes and assignment submission. Many students enjoy the flexibility and convenience that these online enhancements have provided, however if you have concerns about the technology involved, please speak to your instructor immediately.

**STUDENT EVALUATIONS:**

The student will be evaluated on the degree to which student learning outcomes are achieved. A variety of methods may be used such as tests, quizzes, class participation, projects, homework assignments, presentations, etc.

See individual instructor’s course handouts for grading system and criteria (point value for each assessment component in course, e.g. tests, papers, presentations, attendance etc.), number of papers and examinations required in the course, and testing policy including make ups and/or retests.

**GRADING STANDARD:**

- **A** Mastery of essential elements and related concepts, plus demonstrated excellence or originality.
- **B+** Mastery of essential elements and related concepts, showing higher level understanding.
- **B** Mastery of essential elements and related concepts.
C+ Above average knowledge of essential elements and related concepts.
C Acceptable knowledge of essential elements and related concepts.
D Minimal knowledge of related concepts.
F Unsatisfactory progress. This grade may also be assigned in cases of academic misconduct, such as cheating or plagiarism, and/or excessive absences.

For other grades, see the current ROWAN COLLEGE AT BURLINGTON COUNTY catalog.

**COLLEGE POLICIES:**

The current college catalog and student handbook are important documents for understanding your rights and responsibilities as a student in the RCBC classroom. Please read your catalog and handbook as they supplement this syllabus, particularly for information regarding:

- Academic Integrity Code
- Student Conduct Code
- Student Grade Appeal Process

**OFFICE OF STUDENT SUPPORT AND DISABILITIES SERVICES:**

RCBC welcomes students with disabilities into the college’s educational programs. Access to accommodations and support services for students with learning and other disabilities is facilitated by staff in the Office of Student Support (OSS). In order to receive accommodations, a student must contact the OSS, self-identify as having a disability, provide appropriate documentation, and participate in an intake appointment. If the documentation supports the request for reasonable accommodations, the OSS will provide the student with an Accommodation Plan to give to instructors. Contact the Office of Student Support at 609-894-9311, ext. 1208 or visit the website at:

www.rcbc.edu/studentsupport

**ADDITIONAL SUPPORT/LABS:**

RCBC provides academic advising, student support personal counseling, transfer advising, and special accommodations for individuals with disabilities free to all students through the Division of Student Services. For more information about any of these services, visit the Laurel Hall on the Mt. Laurel Campus, or call (609) 894-9311 or (856) 222-9311, then dial the desired extension:
- Ext. 1557 Academic Advisement and Counseling
- Ext. 1803 Special Populations
- Ext. 2737 Transfer Center

Or visit the following websites:

- Academic Advising  www.rcbc.edu/advising
- Student Support Counseling  www.rcbc.edu/counseling
- Transfer Center  www.rcbc.edu/transfer
RCBC offers a free tutoring for all currently enrolled students. For more information regarding The Tutoring Center call Extension 1495 at (609) 894-9311 or (856) 222-9311 or visit the Tutoring Center Website at www.rcbc.edu/tutoring
